

Cleaning Hints & Tips

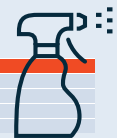

HOW TO GET THE MOST OUT OF ACTIVATOR

- Always use with **cold water**.
- For best results, apply diluted **Activator** over the area before rinsing, wiping, dabbing or hosing off. For stubborn areas leave on for several minutes.
- **To prevent frothing**, add the cold water to your spray bottle first before adding the Activator.
- **Suitable for all hard surfaces** including wood, vinyl, tiles, stainless steel and stone plus great for spot cleaning carpets and upholstery.
- **To remove odours from pets, toilets, rubbish bins and carpets**, spray the offending area liberally.
- For odours or blockages in household drains, see over for instructions.
- To keep your spray bottle of **Activator** smelling fresh, **rinse and re-fill spray bottle fortnightly**.

Dilution Rate for Cleaning

The dilution rate on your Ecocare
Activator spray bottle is 1:5

(1 part Activator to 4 parts cold water)

1:5

All Kitchen surfaces:
benches, stove tops, sinks

All Bathroom surfaces:
bath, shower, toilet, tiles

BBQ's and other greasy
surfaces

1:10

Floors, carpets and soft
furnishings (spot clean)

Odour from pets,
rubbish bins, toilets,
carpets

1:40

Windows and mirrors

Total Wastewater Solution

- ✓ ELIMINATE ODOURS
- ✓ CLEAR BLOCKAGES
- ✓ CONDITION YOUR WASTEWATER

Treatment Situation >		Quantity >	Area & Method >	Duration
1	Septic & AWTS Prime	For the treatment and prevention of odours and blockages		
		1. First morning of treatment: Enhancer Kit >	Mix EcoCare pH Stabiliser powder with 1L of water >	Flush down a toilet > Once Only
		2. That evening: Enhancer Kit >	Add contents of EcoCare Culture bottle >	Flush down a toilet > Once Only
		3. The following morning: Activator >	Add total of 4 litres of Activator >	Distribute down toilets & household drains leading to septic (add 1 cup cold water per 1 cup Activator) > Once Only - Now go to 2, 3 or 5
2	Septic & AWTS Maintenance	For ongoing treatment and prevention of odours and blockages	Add Activator at the following rate: 1 - 5 people = ½ cup per person per week 6+ people = total of 3 cups per week	Rotate weekly via toilets and drains leading to Septic/AWTS - (when added to drain add 1 cup cold water per 1 cup Activator) Ongoing weekly
3	Trench Blockage	For blockages in rubble, leach drain, trench drain, soakwell	After completing 1 add 3 cups Activator per week	Rotate weekly via toilets and drains leading to Septic - (when added to drain add 1 cup cold water per 1 cup Activator) Weekly for approx. 3 - 4 months. Once trench blockage cleared refer to 2
4	Greywater & Grease Trap	For treatment and prevention of odours, blockages and grease build-up	2 cups of Activator followed by 2 cups of cold water per week	Add weekly via the sink. For best results add 1/4 cup per night followed by 1 cup of water. Prior to first application, flush grease trap and line with water Ongoing weekly or daily
5	Greywater Trench	For blockages in rubble, leach drain, french drain, soakwell resulting from fat, oil or grease	1. After completing 1 add 3 cups Activator per week >	Distribute via drains leading to greywater system (Max. of 750ml, or 3 cups, in the grease trap) >
			2. Add 80ml of EcoCare Culture GF per week >	Distribute via kitchen sink leading to grease trap or greywater system >
6	Household Drains	For odours and blockages	1 cup Activator mixed with 1 cup cold water	Apply to the smelly or blocked drain each evening until the odour or blockage has cleared. Usually 3 - 5 applications is sufficient
7	TOTAL TREATMENT	For complete 'Total Treatment' use part or all of your weekly dose for your household cleaning instead of conventional chemical-based cleaners. See over for dilution rates. Or use our range of 100% septic safe cleaning products – EcoShield.		

1 cup = 250ml

If the tank is full, we recommend getting it pumped out before commencing treatment.

Use Activator without interruption at the correct application rate. This ensures an ongoing healthy system.

Always follow Activator with cold tap water, this is essential for the activation process.

Activator won't solve issues caused by tree or grass roots. Seek specialist help for removal, then contact us for help with restoring your system to peak performance.

Store in a cool place and avoid direct sunlight or heat. Make sure tap and cap are securely fitted.

Avoid harsh cleaners such as bleach, toilet ducks or deodorisers as they reduce Activator's effectiveness.

Use our range of septic safe cleaning products to reduce chemicals entering your system.
