

#### IMPORTANT

Do not dilute the contents of this container all at once. Only dilute enough Activator-V for each use.

**PLEASE NOTE:** EcoCare Activator-V is 5 times stronger than our original EcoCare Activator.

Please read the label carefully before use of the product. For best results, add at night (or during period of least usage).

#### Need some help?

Our team of experienced wastewater consultants is ready to help analyse your situation, resolve any issues you may have, and answer your questions.

#### ODOUR CONTROL

Dilute 1 part Activator-V with 50 parts cold water and spray to destroy odours in rubbish bins, toilets, kennels etc. To remove odours from carpets, apply liberally, leave for 5-10 minutes and then dab dry.

#### REUSABLE HAND PUMP

3 full pumps are equal to 25ml of Activator-V or one person's weekly dose. Use pump for greater convenience and better measurement accuracy. Please do not throw away pump as it is reusable.

#### CLEANING

Dilute 1 part Activator-V with 25 parts cold water for household cleaning. Spray on, leave for a few minutes, and then rinse off. Suitable for use on showers, floors, toilets, sinks, tiles, windows, BBQs and all other hard surfaces.

#### SEPTIC/AWT SYSTEMS\*

When priming the system for the first time, flush 800ml of Activator-V down the toilet - this only needs to be done once. When maintaining the system, continue to add 25ml of Activator-V per person to the system weekly, via toilet or drains. When adding via drains follow with 1 litre of cold water.

#### ABSORPTION TRENCHES\*

To remove trench blockages and odours, flush 800ml of Activator-V down the toilet - this only needs to be done once - and follow up by adding 150ml of Activator-V to the system per week via toilet or drains. A minimum of 3 litres of Activator-V will need to be added over a 3-4 month period to unblock trenches.

#### GREYWATER/GREASE TRAP

To reduce build-up and odour, add 100ml of Activator-V followed by 1 litre of cold water per week. For best results, add small amounts each night. Prior to first application, flush grease trap and line with cold water.

#### DRAINS

To remove blockages and destroy odours, add 50ml of Activator-V followed by 1 litre of cold water to affected drain daily until blockage is cleared and odour eliminated.

\*for repriming/reseeding systems, please refer to your Ecocare Enhancer Kit packaging for instructions.
