

## ODOURS Instructions

EcoShield Odours is specially formulated to break down and eliminate the toughest of household odours. Using a unique blend of natural ingredients, EcoShield Odours traps household odours so they can't spread and then digests the odour causing molecules - eliminating odours for good. If you've purchased a 5L or 20L container of EcoShield Odours, please fill the free reusable spray bottle that came with it for easy use.

### HARD SURFACES

- Spray EcoShield Odours onto the surface with the odour, leave it for a few minutes, then wipe away.

### SOFT SURFACES

- If you can wipe, dab or remove any material causing the odour do that first.
- Then spray EcoShield Odours liberally onto the carpet or soft furnishing with the odour and leave it for a few minutes.
- With soft furnishings it's best to leave it for a little longer, 10 minutes or more.
- Do not rub or wipe EcoShield Odours away - dab with a damp sponge or cloth.
