

PETS Instructions

EcoShield Pets is specially formulated to break down and eliminate the toughest of pet stains and odours. Using a unique blend of natural ingredients, Pets traps odours so they can't spread and then digests the odour causing molecules - eliminating odours for good. If you've purchased a 5L or 20L container of EcoShield Pets, please fill the free reusable spray bottle that came with it for easy use.

CLEANING

Animal Runs

- Spray area to be deodorised, leave Pets for a few minutes and then wash away with water.

ODOUR CONTROL

Odour Control - Hard Surfaces

- Spray Pets onto the surface with the odour, leave it for a few minutes, then wipe away.

Odour Control - Soft Surfaces

- If you can wipe, dab or remove any material causing the odour do that first.
- Then spray Pets liberally onto the carpet or soft furnishing with the odour and leave it for a few minutes.
- With soft furnishings it's best to leave it for a little longer, 10 minutes or more.
- Do not rub or wipe Pets away - dab with a damp sponge or cloth.
